<p>TRIGGERS</p> <p>TR</p> <p>When triggers customers to act?</p> <p>They need to travel to hospital and wait for a long time to visit doctors to check whether they have chronic disease or not.</p>	<p>SL</p> <p>We have collected dataset from kaggle. After doing preprocessing, we have developed both regression and classification model. Regression model is built with RandomForest Regressor and classification model is built with RandomForest Classifier. The finally our model is fit with html pages to have good user interface. This was connected using Python flask web framework.</p>	<p>8. CHANNELS of BEHAVIOUR</p> <p>CH</p> <p>8.1 ONLINE</p> <p>What kind of actions do customers take online? Customers need to enter their details in our web frame work to get final results in online</p> <p>8.2 OFFLINE</p> <p>What kind of actions do customers take offline?</p> <p>The need to have their medical report details.</p>
<p>10. YOUR SOLUTION</p>
